Forecast for Friday 06 Oct 2023

Weather: Rather cloudy and damp during the first part of the morning in the west, with the east drier. Gradually becoming generally dry towards lunchtime, although cloud should remain, with some limited brighter intervals perhaps possible in the east later ahead of more extensive cloud arriving in the evening.

Chance of cloud-free hill tops above 600m: Ranging from 20% in the west to 40% in the east

Low cloud and visibility: Broken cloud 500-600m across western summits, clearer in the east. Visibilities good, but moderate in early rain across western ranges.
